

How School Districts Can Use Analytics to Improve Academic Performance

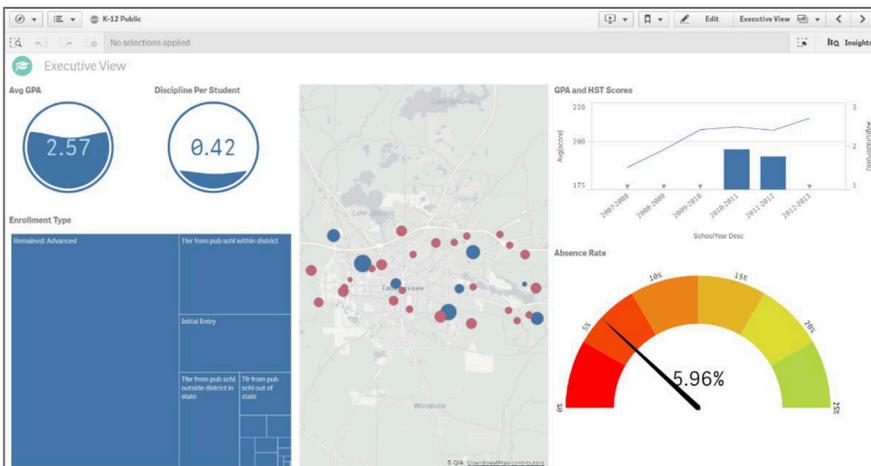

The Copley Consulting Group is the premier reseller and implementer of Qlik Software for K-12 districts. The Qlik Platform is an easy-to-use, self-service analytics solution designed to place advanced analytics in the hands of everyone in an organization, from technical professionals to key staff, and to assist institutions challenged with analysis across disparate data systems.

Perhaps the most important use of Qlik and Copley Consulting in a K-12 environment is the visibility provided into potentially troubled students. Using Qlik's unique ability to draw data from multiple sources, school administrators can, for the first time, see a complete picture of a student.

Also, every Qlik visualization and dashboard can be directly embedded into an existing website, giving the public the ability to interact with Qlik and drill into the information they want to see about their district.

By leveraging the Qlik Platform, K-12 school systems can make more informed decisions utilizing all the data they collect on their students, teachers, faculties and programs, with the end goal of a successful student body.

How Other K-12 Organizations are Leveraging Qlik

- **ENROLLMENT** - holistically understand characteristics of enrollment across school districts
- **PERFORMANCE** - analyze classroom performance and provide assistance to those in need
- **EVALUATION** - evaluate attendance, behavior and academic data to identify areas of need at the Student, Class and School level
- **SCHOOL SAFETY** understand risk factors for potential school safety emergencies
- **OPTIMIZATION** - optimize bus routing
- **EMBEDDED ANALYTICS** - share public-facing school data in an interactive format on the school website
- **PREDICT** - proactively predict the likelihood of a student dropping out in the future

LEARN MORE

It was great meeting everyone at the recent FADSS Conference. If you didn't get a chance to speak with us and would like to learn more about how the **Qlik Analytics Solution** can help you make more informed decisions, contact us at qlik@copleycg.com or visit copleycg.com/education.
